Job Title: Construction Foreman

Job Overview:

A construction foreman is responsible for supervising and coordinating construction activities on a job site. You will work closely with the Greenscape owner and your own crew to ensure the successful completion of construction projects.

Key Responsibilities:

Project Supervision:

- Manage day-to-day operations of the construction site.
- Interpret and enforce project plans and specifications.
- Ensure work is performed in compliance with building codes and safety regulations.
- Monitor progress and make necessary adjustments to meet project deadlines.

Team Leadership:

- Supervise and coordinate the activities of construction workers and subcontractors.
- Assign tasks and responsibilities to crew members.
- Provide guidance and training to ensure work quality and efficiency.
- Maintain a safe and productive work environment.

Resource Management:

- Take care of equipment and materials to optimize productivity.
- Communicate if something needs to be ordered and track materials and supplies as needed.
- Make sure tools and equipment are properly maintained and put away.

Quality Assurance:

- Conduct inspections to ensure workmanship meets quality standards.
- Identify and address any issues or defects promptly.
- Implement quality control processes and procedures.

Safety Compliance:

- Enforce safety protocols and regulations on the job site.

Communication:

- Collaborate with owner and crew.
 - Maintain accurate project documentation, including daily reports, progress updates, and change orders.
- Communicate project status and issues to owner.

Problem Solving:

- Identify and resolve construction-related issues and challenges.
- Make decisions to keep the project on track and within budget.
- Anticipate and plan for potential problems.

Qualifications:

- High school diploma or equivalent; additional education or certifications in construction management is a plus.
- Several years of experience in construction, with a track record of progressively increasing responsibility.
- Strong knowledge of construction methods, materials, and safety regulations.
- Leadership and team management skills.
- Excellent communication and problem-solving abilities.
- Proficiency in reading and interpreting plans and construction documents.
- Familiarity with project management tools (Jobber). No experience needed...this is a simple application.

Physical Requirements:

The role may require the ability to lift heavy objects, work in various weather conditions, and spend extended periods standing or walking on construction sites.

A construction foreman plays a vital role in ensuring that construction projects are completed successfully, on time, and within budget. Your leadership and management skills are essential for maintaining a safe and productive work environment while delivering high-quality construction work.
